# CSci 363 User Interface Design
# Assignment II

Develop an analysis level UML class diagram (class names, attributes, and relationships only) of the entities and relationships that would be relevant in an online university student course enrollment system.

All assumptions made must be included in the submission. The diagram **MUST NOT** be hand drawn, but computer printed from editors or CASE tools. The StarUML CASE tool is available in the labs or can be downloaded from https://staruml.io/.

Assignment project file (*FirstnameLastname*-Assignment02.zip) must be submitted in **Blackboard** and includes: course name, semester, assignment number, date, student name.
